

Cutting-edge GPS satellite technology makes the RL100 the most advanced portable radar and laser detector on the market today.

Features

Benefits

12 Customizable Settings:

No two drivers, vehicles, or driving environments are the same. The K40 RL100 is completely customizable to your specifications.

GPS based 'Mark to Alert' function:

Mark points of interest that you want to be alerted to. This feature gives you the ability to "mark and unmark" **ANY** location. Giving you the freedom to **BUILDYOUR OWN** data-base of locations that are important to you. No annual subscriptions, no internet databases, and no weekly downloading or updating from a home computer or laptop

K40's exclusive Quiet Ride™ technology:

Allows you to set a minimum MPH detection speed that eliminates all audible alerts until the vehicle exceeds that selected speed. Ideal for long road trips or where you only want to be alerted to radar/laser if you exceed a set speed limit.

K40 Speed Monitor (programmable feature):

Gives the driver a constant audible alert whenever a pre-selected speed is exceeded, as well as a visual alert telling you to "slow down". Great for young or new drivers. Speed Monitor will override Quiet Ride™.

Fully Programmable Radar/Laser Alert Options:

Enables you to eliminate audible and visual alerts to specific radar bands or laser. This programmable feature is utilized if your vehicle has radar based safety accessories, or when travelling in congested urban areas where non-police radar signals may be prevalent.

Voice or Tone plus Digital Display:

Unique audible and visual warnings tell you specifically which police radar band is targeting you as well as a Geiger counter to notify you how close the threat is.

Vibrant LCD Digital Display:

Great looking and easy to read day or night. Easily adjust the brightness to suit your driving environment. Default display shows your filter setting, your compass direction, and speed reading.

Intermediate Frequency Rejection Software™:

Reduces false radar warnings from door openers, microwave towers, bank alarms and other non police transmitters without sacrificing performance to real police radar threats.

Memory Retention:

The RL100 maintains all of your preferred/customized settings even after the unit is turned off or unplugged.

Auto Start-Up and Auto frequency Calibration:

Automatic self-test sequence verifies the unit is operating properly each time it is turned on. Select from two modes of self-test sequences, full or an abbreviated quick start.

Accessories Included:

Everything you need to install the RL100 is included. Fully adjustable windshield mount ing bracket with suction cups, a standard coiled power cord with 12V outlet adapter, as well as a straight power cord for a custom hardwired installation.

The worlds best guarantees
from the industry leader, since 1981

K40 continues to offer the best guarantees in the industry – as it has since 1981. It's a confidence that comes from three decades of designing the very best automotive radar and laser protection systems in the world.

100% Ticket-Free.....GUARANTEED!

Speeding tickets covered in full for one year from date of purchase. Does not include tickets issued in Construction Zones, School Zones or in connection with a DUI or DWI. You **MUST** register your product within 30 days to be eligible.

100% Performance.....GUARANTEED!

If your K40 RL100 radar detector does not outperform any other radar detector you've owned, return it to your original place of purchase within 30 days for full product credit.

100% Quality.....GUARANTEED!

K40 backs the RL100 for one full year with our exclusive "repair or replace" warranty If your product fails to work properly.
